DETAILED ACTION

Election/Restrictions

1. In communication filed 6/09/03, Applicant elected claims 1-4 and 6 without traverse.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-3 and 6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-5 of U.S. Patent No. 6,038,035. Although the conflicting claims are not identical, they are not patentably distinct from each other because the Applicant discloses an algorithm for providing a legally usable and authenticated document and storing the scanned original document image onto an electronic storage medium at a first location, while U.S. Patent No. 6,038,035 teaches a method of providing a legally usable and authenticated document and storing the scanned original document by scanning an original document by a computer scanner at a first location and destroying the original scanned information at the first location. Therefore, it would be obvious to consider that the computer at the first location stores the scanned original document image onto an electronic storage medium.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Hasegawa (U.S. Patent No. 5,354,001).

5. For claim 4, Hasegawa discloses an apparatus for duplicating an original document comprising: a computer (Fig. 2; col. 3, lines 47-48); a scanner cooperative with the computer (5 Fig. 1; col. 3, lines 21-33); a printer cooperative with the computer (col. 9, line 54 – col. 10, line 2); a document transport means cooperative with the scanner so as to transport a scanned document to a destruction means (3, Fig. 1; col. 3, lines 25-42); a computer monitor cooperative with the computer so as to display information which has been scanned and verify its accuracy as an image of the transported document (57, Fig. 1; col. 4, lines 27-32); and means to initiate destruction of the transported document upon verification of the image accuracy (Fig. 3; col. 4, lines 53-65).
